MAKE IT YOUR OWN

It's not just any bathroom, it's your bathroom. You select the tiles that reflect your style. You refuse to compromise in the selection of the tap for your washbasin. And here you will find just the right actuator plate for the WC to give your bathroom the crowning touch and pamper you with comfort functions. Because Geberit combines visual elegance with innovative functions.

WHY NOT TRY OUT YOUR OWN DESIGNS?

We have included actual-size illustrations of various actuator plates in the brochure for you. Fold back the left-hand side of the brochure, hold the design up to the wall and let your imagination run wild! Use these actual-size samples to select the actuator plate that appeals to you.

66 GEBERIT FUNCTIONS

Choice is important.

22/44 PRECIOUS METALS

Selecting the right design options for a bathroom means ensuring that individual nuances are perfectly coordinated. Actuator plates in new, fashionable metal colours are the perfect match for the latest trends in taps, while plates made of glass, concrete-look solid surface materials or natural Mustang slate and black walnut blend harmoniously into almost any decor style. The ideal combination for your dream bathroom is just waiting for you to discover it.

SIGMA70

FLOATING DESIGN, **MINIMALIST AESTHETIC**

A sleek, frameless design, convex surface and slimline structure combine to create the floating illusion of this innovative actuator plate. Its clean, geometric design and sophisticated materials meet the highest aesthetic standards and make the plate a firm favourite for all those who appreciate its architectural design language.

NEW

■ GEBERIT

PRECISION MECHANICS

The Geberit Sigma70 actuator plate uses a tried-and-tested mechanism with two perfectly coordinated buttons for the water-saving dual flush. The gap between the buttons is so narrow and precise that the surface of the plate appears to be made of a single piece. This minimalistic design supports simple and intuitive operation.

A close-up, low-angle photograph of a brushed metal actuator plate. The plate is positioned diagonally, with the top right corner pointing towards the upper right. The surface has a fine, horizontal brushed texture. In the upper right portion of the plate, the Geberit logo is visible, consisting of a small square icon followed by the word "GEBERIT" in a bold, sans-serif font. The lighting is soft and directional, coming from the right, which creates a subtle gradient and highlights the texture of the metal. The background is a blurred, light-colored surface, possibly a wall or another part of the fixture.

GEBERIT

A variety of colours and materials for aesthetically sophisticated bathroom furnishings that have been perfected down to the last detail: Everything you need to know about Geberit Sigma70 can be found from **page 28**.

VARIETY

Sophisticated materials and elegant colours underline the architecturally clean design of the Geberit Sigma70 actuator plate. The plate is available in black, sand grey, lava and white glass, in red gold, black chrome and brushed stainless steel, in brass, as well as in black matt and white matt.

■ GEBERIT

AESTHETICS AND FUNCTION

Unobtrusive yet reliable. Geberit ensures, supreme convenience and durability, all from behind the wall. All that remains visible is the interface with the technology: the actuator plate. The selection of actuator plates is important because you will live with your selection for years. Choose the actuator plate that best suits you and your bathroom from a wide range of options.

New ideas and functions can always be derived from a rectangular shape. This is how Geberit enables you to come up with a contemporary, personalised bathroom design.

THE PERFECT SHAPE: THE CIRCLE

Aesthetic curves for a relaxing bathroom experience. It is impossible to improve on circles; they can only be restaged and rearranged. Geberit actuator plates use new interpretations of round forms to adapt to today's trends. With or without rims. With finely honed edges. Harmoniously adjacent or flowing one into another. And the result is always well rounded.

NO-TOUCH FLUSH

Electronic hygiene. Recent surveys have revealed that fewer and fewer bathroom users are happy to actuate the flushing process manually – instead, they are increasingly looking for sanitary technology that features touchless operation. By offering electronic WC flush actuators using IR sensors, Geberit has a solution to meet this growing demand. And while it requires your toilet to have an electrical connection, this is a feature that is fast becoming the norm anyway.

TOUCHLESS FUNCTION

GEBERIT CISTERNS SIGMA AND OMEGA FOR ANY APPLICATION

So that everything matches: used in combination with the matching concealed cistern, Geberit actuator plates in the Sigma range cover a wide variety of applications and comfort functions. The Geberit flushing system Omega offers great flexibility and particularly small actuator plates. Both flushing systems offer tool-free final installation and guaranteed spare parts availability for 25 years.

You therefore have a wide selection of both Geberit actuator plates and reliable Geberit installation elements for installation behind the wall. And Geberit actuator plates bear the name of the suitable cistern so that you can be certain that everything will match.

Omega60, white glass
WC: Geberit AquaClean
Mera shower toilet

CHOICE IS IMPORTANT

Intelligent functions from Geberit. If you can start your toilet flush without touching it, if elegant colour effects add atmospheric moments to the time you spend in your bathroom, or if unpleasant smells are efficiently extracted even before anyone notices them, then this means your plumber has installed state-of-the-art Geberit sanitary convenience in your new bathroom. And because durability and reliability are as much a part of Geberit as good design, you will enjoy your selection for years to come.

GEBERIT REMOTE FLUSH ACTUATIONS MORE CONVENIENT BY FAR

The optimal solution. Regardless of the construction situation, using a remote flush actuation can be a the right choice. For instance, in order to locate the flush actuation at a different location, if the design for the WC flush control calls for small but elegant, or if using a Geberit Omega concealed cistern with low construction height causes forceful contact between the WC lid and the front actuation. For such cases, Geberit offers various remote flush actuators with pneumatic force transmission, which can be placed anywhere within a 1.70 m radius of the concealed cistern.

Actuator Type 10
Colour: White
Design ring: Bright chrome

TOUCHED A THOUSAND TIMES

The pneumatics of the Geberit remote flush actuations type 01 and type 10 have been tested for years of stress. The technology is based on air pressure (not on electrical current).

QUITE DISCREET IN FACT

Available as they are in a variety of colours and product materials, the Geberit cover plates open up new design opportunities. A tile-bearing version is available for a particularly discreet appearance.

ODOUR EXTRACTION

FRESH AIR FOR EVERYONE

Unpleasant odours in the toilet are a thing of the past. What is long since standard over every kitchen stove can now be applied in the bathroom. An effective way to get rid of unpleasant odours. The Geberit DuoFresh module removes the bad air directly from the WC ceramic appliance, purifies it using a ceramic honeycomb filter and then returns it to the room. This is extremely effective, as it prevents unpleasant odours from spreading throughout the bathroom in the first place, rendering air fresheners, lighting matches, opening windows and the like completely unnecessary. Thanks to a proximity sensor, the odour extraction always switches on automatically as soon as someone sits down on the toilet. The odour extraction is therefore also a great idea for guest WCs. Benefit from additional comfort thanks to an LED orientation light and the insert for in-cistern sticks. The Geberit DuoFresh module can be easily installed in any Geberit Sigma cistern and can be combined with almost any actuator plate from the Sigma range.

The ceramic comb filter and insert for in-cistern sticks are within easy reach located behind the actuator plate.

The ceramic comb filter purifies the air thoroughly. The quiet fan conveys the cleaned air back into the room.

An additional benefit offers a built-in LED orientation light. Just below the actuator plate a soft glow will guide you the way to the WC – simply perfect.

Unpleasant odours are removed right at the source.

TOUCHLESS FUNCTION

AESTHETICALLY HYGIENIC

You're looking for hygiene and freshness without compromise. We offer flush actuators that fulfil your need without a touch. Without pressing a button and therefore always hygienically.

Touchless actuator plates for WCs and urinals are available in suitably matched designs.

TODAY'S TOILETS ARE MOVING WITH THE TIMES

Electrical connections now come as standard. After all, you expect your bathroom to reflect your changing needs as well as the lifestyle trends that the future is likely to bring. In Geberit WC installation elements, you'll find everything completely prepared for the future – so it can accommodate any changes you want to make in the future, like retrofitting a Geberit AquaClean shower toilet, a convenient odour extraction unit or installing the coloured LED strips that come with the touchless Geberit actuator plate Sigma80.

1. Geberit DuoFresh module with integrated orientation light. Suitable for several actuator plates of the Sigma series.
2. Touchless Geberit actuator plate Sigma80, glass reflective.
3. The Geberit AquaClean Mera shower toilet with outstanding design and numerous comfort features.
